What is the most popular film category by number of rentals?

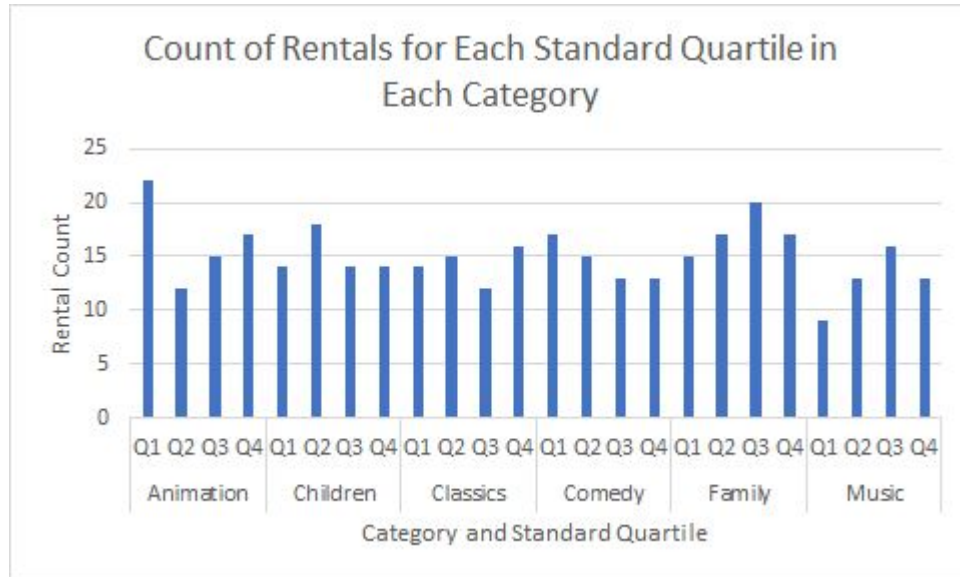

As we can see by the chart, the Animation category has the most rentals (“Workspace + Question Set #1”, n.d.).

What is the number of rentals per standard quartile?

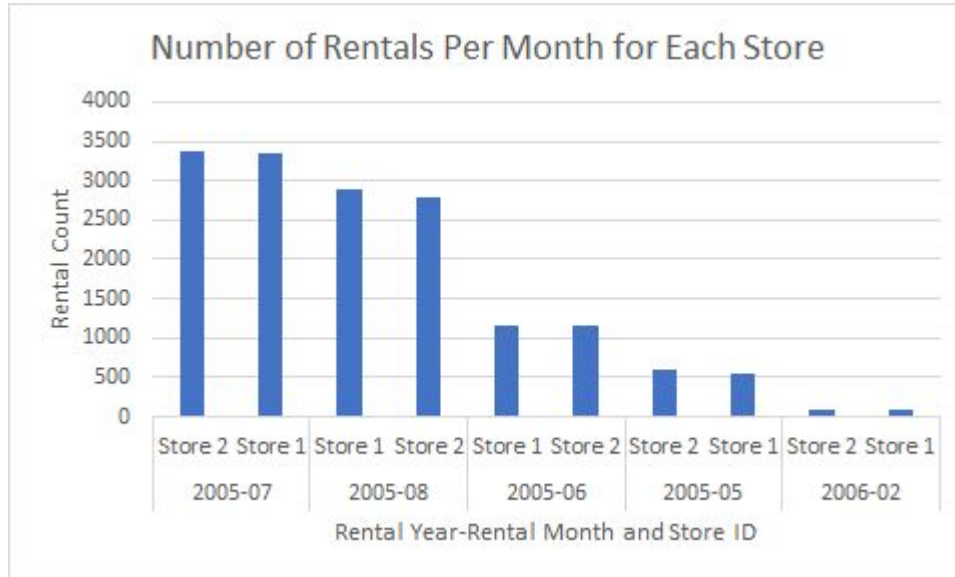

A movie belongs to a certain quartile depending on the length of the rental duration, for example, the shortest rental length is in the first quartile, and the longest rental length belongs in the fourth quartile. All of the quartiles have the same number of movie rentals except for the first quartile, which has one more movie rented compared to the rest of the quartile (“Workspace + Question Set #1”, n.d.).

What is the count of rentals for each standard quartile in each family-friendly category?

We can see that this chart shows the count for each standard quartile and which family-friendly category they belong to (“Workspace + Question Set #1”, n.d.).

What is the rental count for each store for each rental period?

From this chart, we can see that each store had about the same number of rentals for each rental period (rental year and rental month) (“Workspace + Question Set #2”, n.d.).
